PROFESSIONAL SUMMARY

Motivated Computer Science Engineering student at Bapuji Institute of Engineering and Technology (BIET), Davangere, with hands-on experience developing web applications and AI-powered solutions. Familiar with full-stack development, database integration, and generative AI using modern web technologies. Interested in building practical, user-focused applications and exploring opportunities in software development and data analytics.

EDUCATION

Bapuji Institute of Engineering and Technology (BIET) — Davangere, Karnataka
Bachelor of Engineering (B.E.) in Computer Science and Engineering
Relevant Coursework: Data Structures and Algorithms, Database Management Systems, Object-Oriented Programming, Java Programming, and Computer Networks.

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, C, JavaScript, TypeScript, SQL
- **Frontend Development:** HTML5, CSS3, React.js, Next.js, Tailwind CSS
- **Backend & Database:** Node.js, Express.js, Supabase, PostgreSQL
- **AI & Integration:** Google Gemini API, AI-powered application development
- **Tools & Platforms:** Git, GitHub, VS Code, Vercel
- **Core Concepts:** Full-Stack Web Development, Database Management, REST APIs, Problem-Solving

FEATURED PROJECTS

1. Government Scheme Eligibility Assistant (SchemeAI)

Technologies: Next.js, React, TypeScript, Tailwind CSS, Supabase, PostgreSQL, Google Gemini API

- Developed an AI-powered web application to help users identify government schemes based on their profile and eligibility criteria.

- Implemented eligibility checking using factors such as age, income, occupation, category, gender, and state.
- Integrated Supabase for scheme data storage and Google Gemini AI for explaining eligibility results.
- Provided official scheme links to help users access further information.

2. CivicFix — Smart Civic Issue Reporting and Resolution Platform

Technologies: Next.js 14, React, TypeScript, Tailwind CSS, Supabase, PostgreSQL, Leaflet, OpenStreetMap

- Developed a civic issue management platform connecting citizens, municipal administrators, and field teams through a structured reporting and resolution workflow.
- Implemented location-based issue reporting with GPS coordinates, interactive maps, and photographic evidence.
- Designed AI-assisted issue triage, department routing, team assignment, and real-time status tracking.
- Incorporated repair-evidence uploads and administrative verification to improve transparency and accountability.

Link : https://civic-fix-gamma.vercel.app/

3. ORCA — Smart India Hackathon Project

- Contributed to a project developed in the context of a hackathon.
- Focused on translating a problem statement into a practical software solution.

GitHub: https://github.com/Zyphron01/ORCA

Link : https://orca-eta-ochre.vercel.app/

HACKATHONS & ACHIEVEMENTS

- **Smart India Hackathon (SIH) — Internal Hackathon Participant:** Participated in the internal hackathon, conducting technical problem breakdown and rapid prototyping architecture for national problem statements.
- **Project Development:** Collaborated on technical projects including CivicFix and ORCA, focusing on problem-solving, technical implementation, and practical software solutions.

AREAS OF INTEREST

- Data Analytics
- Full-Stack Web Development
- Artificial Intelligence and Generative AI
- Database Management
- Software Engineering
